1. INTRODUCTION

The purpose of this Request for Proposal is to solicit submissions from qualified firms for a project to incorporate active transportation within Electoral Area 'G' Official Community Plan Bylaw 1540, 2008 (OCP) for the French Creek Growth Containment Boundary. While the OCP currently contains a strategy for desirable active transportation links, the amendment will update the policies and mapping with options for improvements and implementation of active transportation infrastructure. The OCP requires more detailed objectives and actions for active transportation for priority areas, identification of specific barriers and obstacles associated with active transportation, and recommendations for policy development to improve opportunities and remove barriers. The Proponent will be responsible to:

- Identify existing active transportation conditions;
- Plan and lead a public consultation process regarding active transportation in the community;
- Prepare graphic and public consultation materials;
- Identify and evaluate options for creation or improvement of active transportation facilities;
- Recommend policies, maps and an implementation strategies suitable for inclusion in the Official Community Plan.

Proponents must refer to the complete Request for Proposals Document for detailed information regarding proposal submission requirements. The final report is to be completed by November 2021 with presentation of a final report to the Electoral Area Services Committee.

The budget for this project is $85,000 exclusive of applicable taxes.

2. BACKGROUND

2.1 Community Overview

Electoral Area G is an unincorporated area within the RDN situated between the municipal boundaries of both the City of Parksville and Town of Qualicum Beach. Electoral Area G includes the communities of French Creek, Dashwood, and San Pareil. The French Creek Rural Village Centre is defined by the Growth Containment Boundary designated within the OCP and Regional Growth Strategy (RGS). In 2016, at the last census, the population of Area 'G' was 7,465 people. Population density is relatively high for an electoral area at 151 people per square kilometer.

French Creek is one of the few Rural Village Centres that are serviced by community water, community sewer and transit services. Given the higher density and available services, French Creek is one of the few Rural Villages that have the resources and characteristics of a 'complete compact community' envisioned by the RGS. Despite the 'urban densities' of French Creek, the road infrastructure was constructed to a rural standard without sidewalks or wide shoulders for pedestrians. Without ownership and authority over roads, the RDN relies on the Ministry of Transportation and Infrastructure to implement or approve active transportation infrastructure within the road right of way.

As Area G is situated between Parkville and Qualicum Beach, French Creek residents rely on transportation networks and services in the neighbouring municipalities. Currently, the Parksville Qualicum Links provides an active transportation network with 13 kilometres of road and trail through suburban areas and a pedestrian / cyclist bridge over French Creek. While the network contains signage and is mostly low traffic in many locations, there is no demarcation for a roadside or off-road trail and

active transportation infrastructure. Major roads also lack safe routes for pedestrian and cyclists between the municipalities, including many portions of Highway 19A where the shoulder is narrow and speed limits range from 60 to 70 km/h. A new pedestrian connection is also necessary over French Creek on Highway 19A as the existing bridge is narrow for both cyclists and pedestrians.

The only school within the French Creek area is Oceanside Elementary School. The school is bordered by the Island Highway 19A and Wembley Road, both of which experience large volumes of traffic. Improvements by the Province of BC were made to Wembley Road in 2015 due to concerns for children's safety. However, pedestrian safety and traffic is still a concern in the area.

The French Creek area and neighbouring municipalities have an older population compared with other areas of the RDN, influencing the form of active transportation modes. The median age of Electoral Area G is 58.5 years, whereas the RDN is 51.1 years, and the Province is 43 years.

2.2 Policy Context

The active transportation amendment to the OCP is expected to be consistent with and supportive of the bylaws, plans, policies, and initiatives that have been completed to date including the following:

- Community Energy and Emissions Plan (2013)
- Community Parks and Trails Strategic Plan (2013) including associated maps and plans
- Regional Growth Strategy (2011)
- Regional Parks and Trails Plan 2005-2015
- Electoral Area 'G' Official Community Plan (2008) (Maps 4 – Parkland and 8 – Mobility Options)

The Area 'G' Official Community Plan, Regional Parks and Trails Plan, and Community Parks and Trails Strategic Plan contain policies and mapping to provide direction on desirable active transportation projects and links within French Creek. The strategies outline roadside routes, highway improvements, infrastructure, and trails that link neighbourhoods to parks, schools, waterfront areas, and neighbourhood centres.

The active transportation amendment to the OCP will consider the guides and manuals that apply to roads and highways in electoral areas, including:

- British Columbia Active Transportation Design Guide (2019)
- Pedestrian Crossing Control manual for British Columbia

The BC Ministry of Transportation and Infrastructure (MOTI) has jurisdiction over roads and infrastructure within the road right-of-ways. Policies in the OCP and subsequent infrastructure proposed for road right-of ways will be developed in collaboration with MOTI. Active transportation in French Creek will also take into account integration with transit, active travel to schools and integration with networks in Parksville and Qualicum Beach.

3. PROJECT OBJECTIVE

The active transportation amendment will identify and evaluate options for creating or improving facilities for active transportation for the purpose of improving community health through physical activity, improving community connections, and reducing greenhouse gas emissions by providing alternatives to vehicle use. The active transportation recommendations, including an implementation strategy, will be incorporated into the Electoral Area G Official Community Plan.

The French Creek area is a common connection route between the Town of Qualicum Beach and the City or Parksville. Walking and cycling are possible in the area due to the close proximity of community amenities: public transit hubs and routes, recreation facilities, parks, grocery stores, markets, elementary and high schools, senior's housing, and parks or green space. Knowledge that will be generated through this project will assist in identifying the best ways to approach barriers and obstacles based on resident's need, including for community connections to services, recreation and safe routes to school.

4. SCOPE OF SERVICES

The active transportation project will be adopted as an amendment to the Electoral Area 'G' Official Community Plan. The tasks identified below outline the project scope and shall be used as a guide for the qualified consultant to develop an active transportation amendment to the Official Community Plan. Bidders are encouraged to be innovative in their response while ensuring that the proposed approach and work plan achieve the fundamental objectives of the study. The successful proponent will be expected to:

1. **Collect and review background information and data**
2. **Identify existing active transportation conditions**
3. **Undertake a public consultation process including at minimum:**
    a. An engagement event for Area 'G' that complies with Ministerial Order No. M139[1] as amended

        - Senior housing residents
        - Local business community
        - Community groups, clubs and organizations
        - Community amenity and facility users
        - Ministry of Transportation and Infrastructure
        - Neighbouring municipalities
        - School District 69
        - Oceanside Cycling Coalition
        - Community Associations
        - RDN Recreation and Parks
        - RDN and BC Transit
4. **Propose a long-term active transportation network**
    Includes infrastructure and improvements needed to realize the long term network with associated graphic material.
5. **Develop an implementation strategy**
    Includes priorities, timelines, responsible agencies, estimated cost, service delivery options and acquisition options.
