1. INTRODUCTION

The purpose of this request for proposal is to solicit submissions from qualified firms to develop fuels management prescriptions for the following Regional District of Nanaimo parks; Descanso Bay Regional Park, Cox Community Park, Moorecroft Regional Park, Kipp Road Community Park, and Malcolm Road Community Park. Prescriptions must be completed by registered professional foresters (RPFs) that are accredited with the Association of BC Forest Professionals (ABCFP) and need to consider the balance between potential fire behaviour implications, resource and conservation values. Approximatly 91.6 hectares of land total will be included in the five (5) prescriptions, as described in the background section below.

The project must be completed no later than **January 31, 2023.**

2. BACKGROUND

A fuel management prescription is a document that describes the wildfire risk and the recommended fuel management activities in an identified area that will reduce fire behaviour attributes. Prescriptions ensure that proposed treatments include clearly defined objectives for fuel management that will result in a measurable reduction in the wildfire risk to a value while meeting all legislated and non-statutory requirements. Recommended fuel treatments are generally located within the 1-kilometer Wildland Urban Interface and can focus on vertical and horizontal fuels, fire weather components, topography and values at risk taking into consideration land management objectives such as retaining the forest canopy.

Descanso Bay Regional Park (Electoral Area B) – This park is a 13.7 hectare campground, adjacent to many residential properties on Gabriola Island. It is heavily vegetated and would benefit from fuel treatments to reduce the risk of wildfire ignition due to high-risk activities within the campground such as campfires. A fuel prescription would also provide guidance for reducing the intensity of wildfires should one ignite within the park.

Cox Community Park (Electoral Area B) – Just across from Descanso Bay Regional Park, Cox Community Park consists of 59.9hectares of forest which abuts residential properties as well as a major transportation corridor on Gabriola Island. Similarly to Descanso Bay Regional Park, a fuel management prescription would guide the RDN on how to reduce risk of wildfire ignition and intensity of wildfires that may occur within the park. Approximately 22 hectares of the park would be included in the fuel management prescription.

Moorecroft Regional Park (Electoral Area E) – This 36 hectare park is adjacent to residential properties on three sides. Additionally, the park includes popular picnic sites. Creating a fuel management prescription that targets 20 hectares of this park will help reduce wildfire ignition risk, reduce potential wildfire intensity, and protect evacuation routes on Stewart and Dorcus Point Roads. A restrictive covenant enforced by the Nature Conservancy of Canada must be factored into the development of fuel management prescriptions for Moorecroft Regional Park.

Kipp Road Community Park (Electoral Area A) – The western portion of Kipp Road Community Park is considered a high-risk area. Additionally, the park straddles Highway 1. A fuel management prescription

that identifies fuel treatment recommendations for all 18.9 hectares of this park will ensure that the major transportation corridor and adjacent residences are made more resilient in the event of a wildfire.

Malcolm Road Community Park (Electoral Area F) – Recent wildfire events, expanding residential development and its proximity to Highway 4 are all risk factors that need to be considered in a fuel management prescription for the 17 hectare community park. A fuel management prescription would also help facilitate access for wildfire first responders should a fire occur within in the park.

3. SCOPE OF SERVICES

- Develop a fuel management prescription for each park : Cox Community Park, Descanso Bay Regional Park, Kipp Road Community Park, Malcolm Community Park, and Moorecocroft Regional Park
- The fuel management prescription must be developed and, where applicable, signed/sealed by a registered forest professional accredited by the Association of BC Forest Professional operating within their scope of practice. Fuel management prescriptions must follow the 2022 Fuel Management Prescription Guidence

- Identify locations in each prescription area that would be suitable for demonstration projects or interpretive signage to encourage FireSmart education within RDN parks.
- Create large format georeferenced PDF maps that clearly represent (at a suitable scale) the required content and spatial data submissions, including metadata as set out by the 2022 UBCM CRI Program Guide Requirements
- Hosting public information sessions to present the process of developing the fuel management prescriptions and answering any relevant questions.
- Host consultation sessions to engage and collaborate with key stakeholders such as the Regional District staff, fire departments, First Nations, municipalities , provincial government representatives and other public organizations.
